

Techo-Spec Pavers

All interlocking pavers manufactured by Techo-Bloc follow strict regulations in their components, be it sand, stone, cement or color. They are all vigorously tested for maximum quality control. Techo-Bloc pavers are manufactured with zero slump concrete and cured in a controlled environment. All pavers must meet the following norms: ASTM-C936 M-09, CSA (A231.2-M95) and the NQ.2624-120/87 which are recognized as the strictest in the world. The main components of these standards can be summarized as follows:

All paving stones manufactured by Techo-Bloc meet BNQ 2624-120 and CSA A231.2-06 standards.

	ASTM-C936 M-09	Techo-Bloc
Compressive strength	8000 psi at 28 days	minimum 9000 psi at 28 days
Durability to freeze thaw cycles	total mass loss no greater than 1%	total mass loss no greater than 1%
Absorption	lower than 5%	lower than 3%
Dimension tolerance of the paver norm	+/-3 mm	+/-2 mm
Other surfaces	-1 mm to +2 mm	-1 mm to +2 mm

Techo-Bloc Colors

sandlewood	Mix of tan and charcoal
tan	Tan
earth brown	Mix of brown and earth tones
shale grey	Mix of grey and charcoal
red and black	Mix of red and charcoal
gey	Grey
onyx black	Dark charcoal
charcoal	Charcoal
red	Red
mojave beige	Mix of brown and tan
champlain grey	Mix of grey, charcoal and tan
autumn red	Mix of deep red, tan, gold
chestnut brown	Mix chocolate brown, light cream
harvest gold	Mix of chocolate brown, light cream, gold
oceana	Mix of Charcoal, light green and light grey
rock garden brown	Mix of mid-light brown, charcoal, brown, moss yellow
chocolat brown	Mix of dark brown, charcoal

Techo-Bloc Colors

COLOR

Techo-Bloc's signature pallet of natural hues creates beauty that is more than skin deep. Pigments are blended right into the mix, making pavements brilliant throughout, not just near the surface. Choose a solid color, or create a diversified look with a blend. Techo-Bloc uses thermodynamically stable iron-oxide pigments, so the color of each individual unit will not fade or wear off when exposed to the elements.

COLOR VARIATION

Comprised of natural ingredients, pavement units vary slightly in color batch depending on environmental conditions. Therefore, colors shown are approximate representations of standard colors and shouldn't be expected to be an exact match.

EFFLORESCENCE

Efflorescence is a natural phenomenon that appears in the form of white powdery film on the pavement surface. Consisting of mostly calcium carbonate, it does not affect the structural integrity of the pavement. Although efflorescence cannot be prevented, it will disappear over time or it can be cleaned with an efflorescence cleaner.

LAYING TECHNIQUES

Proper installation enhances the overall color of pavement. Pavement units should be selected from at least two pallets and then randomly mixed. This creates an attractive and subtle blending of color.

Techo-Bloc Colors (pavers)

01 sandlewood

06 earth brown *

08 shale grey

16 mojave beige
